Dr. Hank Magnuski
311 Stanford Avenue
Menlo Park
CA 94025, U.S.A.

Dear Dr. Magnuski, OM KA6M,

We at both JARL and JAMSAT do not know how to fully express our thanks to you for your kind help and guidance extended to us in our "JAS-1" amateur radio communications satellite.

We owe you a great deal in the systems design of our very first amateur radio communications satellite, which we hope will be launched by NASDA's "H-I" launch vehicle in February of 1986.

FM-1, flight model number one, has just been completed, and it is being currently put through a thermal-vacuum test.

We will keep vou posted on our progress from time to time.

Again, many many thanks.

With best regards,

Sincerely,

S. Hara
